

Abstract

The present invention relates to compounds of the general formula (I) and salts and physiologically functional derivatives thereof,

5

(I)

wherein

A is a non-aromatic ring system containing 4 to 8 carbon atoms, wherein the ring system comprises at least one double bond and wherein one or more of the carbon atoms in the ring can be replaced by a group X, wherein X is selected from the group consisting of S, O, N, NR⁴, SO, CO or SO₂;

10 D is O, S, SO₂, NR⁴ or CH₂;

Z¹ and Z² are independent from each other O, S, or NR⁵;

15 R² is H, OR⁶, or NHR⁷;

E is an alkyl or cycloalkyl group or a monocyclic or polycyclic substituted or unsubstituted ring system which may contain one or more groups X and which contains at least one aromatic ring;

20 Y is hydrogen, halogen, haloalkyl, haloalkyloxy, alkyl, cycloalkyl, a monocyclic or polycyclic substituted or unsubstituted ring system

for the use as a medicament.
